Dear Colleagues,

It is my great pleasure to welcome you to the wonderful “2nd International Meeting on Cosmetology and Trichology” to be held in Dubai, the United Arab Emirates from April 19th to 20th, 2019.

To follow its tradition, this year the conference time came forward again with a useful highly interactive scientific sessions with research leaders, lectures from experts sharing their latest knowledge and vast experience and presentations from editors and authors of highly renowned journals. A comprehensive multidisciplinary program has been assembled and will be presented by a well-selected international faculty. This year the conference will be devoted to the theme “Allocating new possible innovations in Cosmetology and Trichology fields”

The scientific and technical sessions will include all the fields of Cosmetic, Aesthetic, Plastic and Reconstructive Surgery, Hair Care and Transplantation, Cosmetology and Biomedical Sciences. The 2nd International Meeting on Cosmetology and Trichology is a wonderful event for both professionals and beginners to share research and to learn about recent innovations and new methods of treatment from colleagues and experts from all around the world.

The beauty of man is the one of most important thing in the world. Surprisingly, Man has improved his knowledge. He could change his beauty by himself. The human being has reached the peak of his research and achieved success with excellent results. The concept of beauty has changed in the last generation and cosmetic surgery is considered to come as a guaranteed way to reduce the signs of ageing as well as a way to improve chances in life. In their desire for a better appearance patients are increasingly discerning and demanding and it is getting more and more important to perfect the medical art of sculpting and contouring and to create treatments that are tailored specifically to each patient’s needs.

Recent progress in plastic surgery has been rapid and many new innovations and techniques have been developed. Reconstructive as well as head and neck procedures, burn treatment and the development of microsurgery have advanced greatly. In aesthetic surgical and non-surgical procedures, significant attention is given to the aim of further improving safety and consistent long-lasting results.

In the presence of the Doctors, Professors and who have advanced in modernity in this cosmetology field, The Scientific Federation is making progress in organizing these international meetings. Cosmetology-2019 welcomes you all to explore new intellect.

Come and let us all together create an amazing platform. Let's hope that this platform influences much younger, and we hope that future generations will develop and develop their intellect. The venue hopes to switch to an unforgettable sophisticated progression.

Dubai, our hosting city, is a wonderful place to be. Dubai constantly is on the move and striving for perfection and thus it is an excellent platform for this highly scientific and educative event.

I am very much looking forward to welcoming you to the exciting city of Dubai in 2019.

Dr. Tawfik Sefrioui
World-renowned Cosmetic Surgeon
Chair of the Conference Cosmetology-2019
