

# Welcome Message:

Welcome to the Conference 2<sup>nd</sup> International Summit on Dermatology (Dermatology-2019) by the Organizing Committee and Scientific Federation team. As one of the Organizing Chairs of this Meeting, I would like to welcome all of you. Thank you very much for your coming here.

Dermatology is a branch of medicine that has undergone a transformation as a result of the use of new and more sophisticated equipment that have allowed us to anticipate the diagnosis of precancerous lesions, but which has also entered the prevention of skin aging in a preponderant manner.

Together with plastic surgery that represents its surgical extension and beyond, the new frontiers that dermatology must face are, among others, pediatric dermatology and dermatological immunology as well as the use of stem cells or their derivatives.

Together with clinical dermatology, another aspect not to be overlooked is cosmetic dermatology, which has now become a specific branch of medicine, the aesthetic/cosmetic medicine. The importance of the treatment of wounds and burns should not be overlooked, as well as the cosmetic gynecology which has both a gynecological and dermatological and a plastic surgery component. Our conference will offer the opportunity to exchange opinions, information and ideas.

There will be an opportunity to tackle controversial topics, such as the use of stem cells or their derivatives that are opening a new era of therapeutic possibilities or as the introduction of new drugs and new treatment methods with new medical devices.

The most important aspect of this conference Dermatology-2019, in my opinion, is the possibility of bringing together young doctors and researchers with more “aged” clinicians and scientists and therefore offer the opportunity to compare the fresh ideas of young people with the clinical experience of old doctors.

A good training is not only a matter of “how to do it” but also a matter of appreciating “tips and tricks” from more experienced persons, and this conference of Dermatology-2019 is where you could learn it and influence your future lives as clinical doctors and surgeons.

Communication may contribute to human-bridging and to making a new form of human friendship to go, through Science, beyond differences in nationality, race, gender, age, background, culture history and religion.

I hope you all could have an unforgettable impacts with Plenary speakers, established Keynote speakers and Invited speakers. Also poster presentation will be of great interest for all of you.

On behalf of the Organizing Committee, I would like to thank to all Plenary, Keynote, Invited, Contribute speakers and Poster presenters.

**SCIENTIFICFEDERATION** is non-profit international conference organizer, to provide an international forum for the appearance and discussion of cutting-edge research in the fields of science.
