

Welcome Message:

On behalf of the organising committee, team Scientific Federation, the organiser of the seminar and myself, I welcome you all to **2nd International Conference & Expo on Aerospace & Aeronautical Engineering (ICEAAE – 2019)** in Frankfurt, Germany on 18 and 19 Feb. I thank you all for attending this prestigious gathering of scientists, engineers and industries engaged in aerospace related activities.

The aim of this conference as laid out by the organiser Scientific Federation is to promote quality research and real-world impact in an atmosphere of true international co-operation by bringing together the world class renowned personalities to discuss the latest developments and innovations on one common platform.

Aerospace has been a technology driver across the globe. Technical research and innovation is at the heart of this drive. Strict quality and implementation of the zero-defect concept are the key drivers for safety in this sector. Evolution of Aerospace standards and their strict compliance creates confidence among all members within and outside the aerospace community.

Military and civil aerospace is undergoing change due to advent of many technologies like AI. However, it also faces certain threats due to its possible use by terrorists and other such groups. This mandates us to find solutions to such threats and make the technology safe, progressive and growth oriented for mankind. To make this technology available at an affordable cost is also a challenge that industry will have to look into. Intellectual property rights and their misuse must be addressed adequately by all stake holders.

With these very obvious challenges, it is also heartening to note the growth of the sector mainly in Emerging Market countries like India. This growth provides opportunities to all of us and our organisations.

I am sure, in this second edition of ICEAAE – 2019, we shall not only exhibit our capability and strength to the world, but will also find answers to the challenges that lie ahead. I once again welcome you and wish you very happy conferencing and networking.

Happy Networking and Happy landings

From
