Welcome...!!!

Dear Colleagues,

It is a great honor and pleasure to welcome all participants to the 2019 International Congress and Exhibition on Industrial and Manufacturing Engineering (ICEIME-2019). I would also like to extend an invitation to researchers and academia from throughout the world to come to the magnificent and historic city of Prague in August 2019 and participate in this world event which gives all of us an opportunity to share the results of our research, discuss future collaborations, and to network with colleagues from other countries and other institutions of higher education.

On behalf of the Conference Organizing Committee and myself, I would also like to express our appreciation and sincere gratitude to our Keynote as well as our Plenary Speakers, who will be sharing their current research, their vision for advancing the state of the art in Industrial and Manufacturing Engineering and help us build collaborative projects to advance the state of the art in Industrial and Manufacturing Engineering (I & ME).

The theme of our conference is “Industrial and Manufacturing Engineering: Recent Innovations, Concepts, Practical Challenges and Solutions.” In this fast-changing environment for intelligent manufacturing, automation, and ever more complex IT and AI applications, it is crucial for all researchers and practitioners to join forces to help shape the future of I & ME. The ICEIME-2019 International Congress and Exhibition provides an excellent forum for us to shape a vision and roadmap to the future of I & ME.

We are also grateful to our sponsors and exhibitors without whose support we would not be able to have this gathering of prominent researchers in Prague. My sincere hope is that young researchers and those who are in the early stages of their career in I & ME take this opportunity to team with more experienced researchers and discuss the possible ways that they can form joint projects such as the exchange of scholars and students between their respective universities.

I would be remiss if I do not mention that Prague is a beautiful city with many attractions and historical palaces to visit. So, please set aside some time to relax and enjoy Prague’s art, music, world-class museums and exquisite cuisine.

Yours Sincerely

Prof. Majid Jaridi
